THE REPORT
OF THE
PRESIDENT OF THE QUEEN'S COLLEGE, CORK,
FOR
THE SESSION 1904-1905.

TO THE KING'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY,

I have, with my very humble duty, to submit a Report on the condition of Queen's College, Cork, for the session 1904-5.

The number of students attending the College during this session was 251, as against 225 during the session 1903-4.

Of the 251 students, 240 were matriculated and 11 non-matriculated. The number of new students was 81. Of these, 61 came from the Royal University of Ireland, 8 from other colleges and universities, and 11 were not matriculated.

I have the honour to report that the work done in College during the session has been of a satisfactory character, and a fair list of honours and distinctions obtained at the Royal University is appended. I may specially call attention to the success of Mr. Jeremiah M'Carthy, who obtained First Class Honours and a First Class Exhibition at the final examination for the degree of Bachelor of Engineering.

I have to refer, however, as my predecessor did in his last report, to the evident unwillingness of candidates from this College to present themselves for Honours, and particularly for Honours in Medicine, a very striking instance of which was brought under my notice during the past session. I have no doubt that this is, in part, due to the present system of examining for honours and pass adopted at the University; but it seems evident to me that it is also, in part, due to the insufficient number of examiners appointed from this College by the University. There are several important subjects in which this College is unrepresented; notable amongst the earlier group is Chemistry; whilst it is most unsatisfactory that, in such important subjects at the final examination as Pathology, Medicine and Midwifery, this College is wholly without representation. Considering the size and importance of our Medical School it ought not to be necessary or possible to make this

complaint; but I am bound to mention the matter since the comparatively small number of students presenting themselves for honours from this College has sometimes been quoted as an argument in its disfavour. It is an argument which tells neither against the students, who are quite fitted to study for honours, nor against their teachers, who are anxious to prepare them for such examinations, and often urge upon the better men the desirability of reading for and endeavouring to obtain distinctions. It really is an argument against the system under which these examinations are conducted. I should not be surprised to see a decline in the number of students presenting themselves for the examinations of the Royal University of Ireland. I should regret this decline, were it to take place, as I now regret the indisposition of the students to present themselves for honours, for the reasons which I have mentioned. It is disappointing to find students, worthy of higher distinction, contenting themselves with the qualifications of licensing bodies, when they ought to go out from this College the possessors of University degrees. If, however, they cannot be persuaded to take up the University course in Dublin, rather than that they should enter the profession of Medicine merely as diplomates, it might be better for them to enter for the examinations of London University as extern students. At the present time, it seems that a large proportion of the students of Medicine who do not present themselves for examination at the Royal University of Ireland, do not even obtain their diplomas in this country, but go to Scotland for them. I cannot but conclude that there is something wrong in our local systems of examinations when things are as I find them to be.

In making the above remarks in connection with the question of representation on Boards of Examiners I am not to be supposed, for a moment, to be suggesting that the examiners selected from other institutions are capable of any deviation from the strictest impartiality. I am sure that they are not; but it is quite obvious that, in spite of this, students examined by extern examiners are at a great disadvantage as compared with those who are examined by their own teachers. It is plain that the scope of the subjects examined upon is so great, and the aspects from which these subjects can be viewed are so numerous, that the systems of teaching in different institutions cannot, and, indeed, one might fairly say—having regard to the calibre of the instructors who ought to be employed in places of university rank—ought not to be, identical. It follows, then, that students who are examined at examinations where their own teachers are not adequately represented, are at a disadvantage, because they are being examined by a man or by men whose views and methods may differ, and even very widely differ, from those of the teacher under whom they have been trained. One result of this is that students, being aware of the disadvantage under which they are placed, too often devote a large portion of their time to cramming up the kind of questions which they imagine that this foreign

examiner is likely to set. Such a plan is ruinous to all true education, and an Institution which in any way encourages such a system is doing an injury to education rather than promoting it.

At the end of the session I received and transmitted to His Excellency the Lord Lieutenant, who has been pleased to accept them, the resignations of two of the senior members of the staff of this College. Professor Bunnell Lewis, who held the Chair of Latin, was one of the original group of professors appointed at the foundation of the College, and was, I believe, the oldest professor in any of the Queen's Colleges. Professor Savage-Armstrong, who held the Chair of English Literature and History, has been for thirty-three years the occupant of that position. He holds a Fellowship in the Royal University, and his services will be a great loss to the College which he has so loyally supported for a number of years.

During the session a new department has been constituted, and will commence its work next October. This Department is for the training of teachers for Secondary Schools. It has been constructed on lines similar to those at present adopted by several other universities and university colleges, and has received the recognition of the Board of Education of England for the purposes of § 3 (2) i. of the Teachers' Registration Regulations. It is the first institution in Ireland to have secured this recognition, which has been given, in the first instance, for a year, and an inspection of the College and department will take place in the autumn. Several schools in Cork have agreed to allow the practical part of the course to be followed within their walls.

A Lectureship on Education has been created in the College, and has been divided between two occupants—Mr. E. P. M'Swiney, Head Master of the Blackpool School—"History of Education"; and Miss Martin, Head Mistress of the Cork High School—"Methods of Teaching and School Management."

This being my first report since Your Majesty did me the signal honour of appointing me to the position of President, Your Majesty will naturally expect me to comment upon the nature of the accommodation for and the provision of teaching in the College. I proceed, therefore, to mention some few of the matters which urgently require attention, in order that the teaching in this College may be brought up to the highest level. In making these comments I should desire to premise, first, that I am making reference only to internal alterations, though much might be said respecting the far from satisfactory relations of the College with the population around it; and secondly, that in anything I may say I must not be understood as making any reflections on the existing staff. On the contrary, I have seen quite enough of them to be aware that they are working in a splendid manner and achieving results which I cannot but consider to be remarkable, having regard to the very adverse circumstances under which their labours are carried on.

There are, in the first place, three Chairs of a composite character, the duties of each of which should be sub-divided. This is a very pressing need. It is chiefly of importance that the teaching of Anatomy should be severed from that of Physiology. A joint Chair for these subjects—which is a relic of the pre-historic ages of medicine—was out of date when the College was founded, and is now only to be met with, so far as I am aware in the whole civilised world, in the Colleges of Cork and Galway. The Chair of Botany, Zoology and Geology also needs sub-division. It is not impossible to find a man who can teach both Zoology and Botany, though the combination is not a thing to be desired, but where we shall find a successor for Professor Hartog, when the time comes for him to leave us, I do not quite know, for specialisation has now made it extremely difficult to find men with a competent knowledge of these three subjects. During the session the appointment of a Demonstrator of Mineralogy has been sanctioned, for this also is one of the subjects which comes under the cognizance of the Biological Chair.

In the next place, I would call attention to the great necessity which exists for the constitution of a Chair of Pathology in place of the present Lectureship, or at least—for the name is the less pressing of the two matters—for the adequate payment of the present Lecturer, a most accomplished and highly trained gentleman, with valuable knowledge acquired at home and abroad, who now devotes the whole of his time to Pathological work for a miserably insufficient remuneration.

When the great importance of the study of subjects such as Pathology and Bacteriology to the public health and to economic questions is taken into consideration, I feel that I cannot too strongly press this matter.

The mention of this Chair leads me to speak of the next matter, namely, the great need that there is for the provision of further accommodation for the practical departments. These departments are housed in rooms which were too small for their purposes at the time that the College was built, and are now quite inadequate for the classes which meet in them and for modern requirements. I would particularly here allude, as an example, to the case of Natural Philosophy or Physics. This is a subject in which students are now expected to handle and use implements which were unknown at the foundation of the College, and which, even a few years ago, were never seen except in the hands of men of the highest distinction in this subject. In fact the teaching of this subject has undergone a complete revolution in the past few years. Here our professor has to teach ninety students, and has for that purpose only one small laboratory and a class-room. By means of a re-arrangement of space we have provided him with a further extension for his practical work, but this provision can only temporarily meet the difficulty.

I would also plead for further accommodation for the practical work of the classes of Pathology and Chemistry. Both of these departments are housed in the most cramped manner,

and this is particularly to be regretted when one remembers that the subjects in question are so closely connected with the Public Health and with the advancement and success of so many industries. Public Health teaching we do give here, and a number of post-graduate students avail themselves of it; but I should like to extend the teaching of Applied Science very much further, and provide for the instruction in the scientific principles of their business of brewers, distillers, vinegar makers, and other persons engaged in fermentative industries; and I should also desire to provide instruction for teachers of Agriculture and other pursuits in which Chemistry and Bacteriology are of importance. Finally, I should like to constitute departments in which any manufacturer or agriculturalist or other person desirous of a report, chemical or bacteriological, upon any substance, could obtain that report from a specialist for a small fee. These things are being accomplished in England; they are urgently required in this country; they could be perfectly well done here, but the problem cannot be attacked, with any hope of real success, whilst the accommodation is what it is.

In the next place, I would allude to the inadequate accommodation for the teaching of Physiology. This important subject requires three laboratories—one for Chemical, one for Experimental, and one for Microscopical work. The present professor has one laboratory, and that a small one. Lastly, in this connection, I would point to the inadequate accommodation in the Biological laboratory. The garden and plant-house are beyond all praise, but the room for practical work is far too small for the number of students frequenting it, and is by no means well lit, a remark which might be made about other rooms where much has been sacrificed for the sake of architectural beauty.

Want of space must also be my complaint respecting the Library. This contains a most valuable collection of books, open to all genuine students, whether connected with the College or not. It is, in fact, the only library of a character useful to scientific, literary or historical workers in the South of Ireland. Yet it is so cramped for space that it is now exceedingly difficult to know how to dispose of the books which are yearly added to it.

I now pass to the subject of assistants, or demonstrators, in the several departments, and more particularly in the practical departments. I need not dilate upon the hardship of expecting men of distinction to carry out the duties of these departments without any skilled assistance, nor the impossibility of their doing that original work which they would be glad to do, and which would add to the usefulness of this College, were it possible of accomplishment, whilst they are situated as they are at present. I will content myself by pointing out that, so far as I know—and I have a fairly wide knowledge of such matters—there is no other institution in the United Kingdom accomplishing the work which this College is accomplishing, with so small a staff of teachers.

Finally, I would allude to the necessity for a more generous provision for the Museums of the College. These ought to be of great educational value to the people of the district, and they have many visitors during the year, besides being largely utilised by the students. But the amount of money available for the provision of new specimens is wholly insufficient, and there are no funds to pay for skilled persons capable of setting up new preparations. Hence these Museums depend for their success upon the labours of the professors, who are, as I have already shown, overburdened with teaching work to an extent unknown elsewhere.

I venture to submit these matters, with deep respect, to Your Majesty as preliminaries which require immediate attention before other great problems can be attacked.

I have only to say, in conclusion, that the tone and conduct of the students has been excellent; indeed, I am informed by old members of the College that it never was at a higher level. No unsatisfactory incident of any kind has occurred during the time which has elapsed since my appointment to the position of President.

I have the honour to remain, with humble duty,

Your Majesty's most faithful servant,

BERTRAM C. A. WINDLE,

President, Queen's College, Cork.

June 27th, 1905.

Appendix A. XII.—TABLE SHOWING THE NUMBER OF SCHOLARSHIPS IN EACH FACULTY, THE NUMBER AWARDED, AND THE NUMBER OF EXHIBITIONS AWARDED.

Number of Scholarships in each Faculty, &c.	Faculty.	No. of Scholarships.	No. of Scholarships awarded.	No. of Exhibitions awarded.
	Senior Scholarships,	7	4	—
	Arts—			
	Junior Scholarships open to Students of Entrance,	10	10	2
	Junior Scholarships open to Students of One Year's standing,	10	5	—
	Junior Scholarships open to Students of Two Years' standing,	10	7	—
	Law—			
	Junior Scholarships,	4	4	2
	Medicine—			
	Blayney Scholarship,	1	1	—
	Senior and Practical Exhibitions,	—	—	6
	Junior Scholarships,	8	9	4
	Engineering,	5	4	1
	Total,	55	44	15

Subjects
lectured
on.

No. XIII.—TABLE CONTAINING THE NAMES OF THE SEVERAL SUBJECTS LECTURED UPON DURING THE SESSION 1904-5, THE NUMBER OF LECTURES GIVEN ON EACH SUBJECT, AND THE TOTAL NUMBER OF STUDENTS ATTENDING THE CLASSES IN EACH SUBJECT.

	No. of Lectures in each Subject.	Total No. of Students attending the Classes in each subject.
Greek,	238	6
Latin,	207	13
English Language and Literature and History,	308	30
French,	233	51
German,	75	2
Italian,	55	2
Celtic,	—	—
Logic,	53	1
Metaphysics,	—	—
Political Economy,	—	—
Mathematics,	270	58
Natural Philosophy,	328	89
Chemistry, Systematic,	67	60
" " Practical,	71	42
" " (Special classes),	147	4
Geology and Mineralogy,	59	15
† Zoology,	62	46
Botany,	34	45
Practical Zoology and Botany,	†—	27
Advanced Laboratory Work,	—	—
English Law,	48	8
Jurisprudence and Civil Law,	48	8
Anatomy and Physiology,	111	54
" " Practical,	152	91
* Practical Physiology and Histology,	55	28
Medicine,	63	36
Surgery,	62	20
Operative Surgery,	36	25
Midwifery,	65	25
Materia Medica,	62	44
Medical Jurisprudence,	31	26
Engineering,	296	34
Pathology, Systematic,	30	25
" " Practical,	30	25
Practical Pharmacy,	24	32
Ophthalmology and Otology,	24	12
Hygiene,	31	22

* Each lecture lasted about two or more hours

† This class was held five to six hours weekly.

B.—VISITORS, CORPORATE BODY, COUNCIL, AND OFFICERS.

No. XIV.

VISITORS.

THE RIGHT HONOURABLE THE CHIEF SECRETARY FOR IRELAND.
THE RIGHT HONOURABLE LORD JUSTICE HOLMES.
THE MODERATOR OF THE GENERAL ASSEMBLY OF THE PRESBYTERIAN CHURCH IN IRELAND.
THE PRESIDENT OF THE ROYAL COLLEGE OF PHYSICIANS.
THE PRESIDENT OF THE ROYAL COLLEGE OF SURGEONS.

THE CORPORATE BODY.

President—BERTRAM C. A. WINDLE, M.A., D.Sc., M.D., F.R.S., F.S.A.

Professors.

The Greek Language, CHARLES H. KENSE, M.A., F.R.O.I.
The Latin Language, BUNNELL LEWIS, M.A., F.S.A.
Mathematics, A. H. ANGLIN, M.A., LL.D., F.R.S.E.
Natural Philosophy, WILLIAM BERGIN, M.A.
History and English Literature, GEORGE F. SAVAGE-ARMSTRONG, M.A.,
D.Litt., F.R.U.I.
Mental and Social Science, GEORGE J. STOKES, M.A.
Chemistry, AUGUSTUS E. DIXON, M.D., F.R.C.S.
Natural History, MARCUS M. HARTOG, M.A., D.Sc.
Modern Languages, WILLIAM F. T. BUTLER, M.A., F.R.U.I.
English Law, GEORGE C. GREEN, B.A.
Anatomy and Physiology, J. J. CHARLES, M.A., D.Sc., M.D., M.Ch.
MED. F.R.U.I.
Medicine, WILLIAM E. ASHLEY CUMMINS, M.D.
Surgery, C. YELVERTON PEARSON, M.D., M.Ch.,
F.R.C.S.
Materia Medica, JOHN DUNDON, M.B., B.Ch., D.A.O.,
F.R.C.S.I.
Midwifery, HENRY CORBY, B.A., M.D.
Engineering, ALEXANDER JACK, M.A., D.Sc.

Appendix B.
Names of
Visitors.

Corporate
Body,
College
Council,
&c.

The College Council.

THE PRESIDENT.

Professor SAVAGE-ARMSTRONG.	Professor PEARSON.	Professor HARTOG.
" DIXON.	" CORBY.	" JACK.

Officers.

Registrar, ALEXANDER JACK, M.A., D.Sc.
Bursar (acting), D. C. NEWSON, Esq.
Librarian (acting), JOHN FAWCETT, M.A.

Lecturers.

Medical Jurisprudence, P. T. O'SULLIVAN, M.D., D.Ch.
Hygiene, DENIS D. DONOVAN, L.R.C.P. & S. (EDIN.).
Pathology, ARTHUR E. MOORE, M.B., B.Ch., D.A.O.
Ophthalmology and Otology, ARTHUR W. SANDFORD, M.D., M.Ch.
Architecture, ARTHUR HILL, M.R.I.B.A.
Celtic, O. J. BERGIN, B.A.
Demonstrator of Chemistry, JOHN HAWTHORNE, B.A., Ph.D.
Curator of Medical Museums and
Instruments, ARTHUR E. MOORE, M.D., B.Ch., B.A.O.
Demonstrator of Anatomy, DENIS P. FITZGERALD, M.B.
Demonstrator of Surgery, M. CAGNET, M.B., B.Ch., B.A.O.
Demonstrator of Practical Mineralogy, JAMES PORTER, D.E.

Appendix B.

Names of
Scholars
and Exhi-
bitors.No. XV.—SCHOLARS AND EXHIBITIONERS FOR THE SESSION
1904-5.*Senior Scholars.*

MODERN LANGUAGES, LITERATURES, AND HISTORIES	Bowles, Frances E.
HISTORY, POLITICAL ECONOMY AND GENERAL JURISPRUDENCE.	Hollins, Thomas J., B.A.
MATHEMATICS, AND MATHEMATICAL PHYSICS.	Murphy, Jeremiah T., B.A., D.E.
CHEMISTRY AND EXPERIMENTAL PHYSICS.	Dillon, Thomas P.

FACULTY OF ARTS.

*Junior Scholars.**Third Year.*

IN LITERATURE.

(B.) Lynum, Edward W.
(B.) Kelleher, Daniel L.
(A.) O'Brien, Michael.

IN SCIENCE.

Hidge, Arthur.
*(O'Brien, Michael.)
Waters, Thomas J.
Keyms, Joshua.
Dale, Edward W.

* Cannot hold this Scholarship, being appointed in the other division.

Second Year.

IN LITERATURE.

(B.) Christie, Annie M.
(A.) Devane, James.

IN SCIENCE.

Adams, Arthur B.
Connell, Ernest.
Holland, Timothy.

First Year.

IN LITERATURE.

(A.) Given, George E.
(B.) Bresnan, Timothy.
(B.) Joynt, Muriel.
(B.) Phean, Francis.
(A.) Hegarty, Timothy F.

IN SCIENCE.

Ashby, William J.
Flynn, Denis.
MacMahon, Aloysius D.
*(Bresnan, Timothy.)
Bowles, Charles A.
Cummins, Robert C.

Exhibitioners.

Wilson, John C. B.

Wiley, Alan.

* Cannot hold this Scholarship, being appointed in the other division.

SCHOOL OF ENGINEERING.

Third Year.

Smith, Henry W. S.

Exhibition.

Tobin, Joseph E.

Second Year.

O'Leary, Jeremiah.

First Year.

Molloy, Bernard.

Irwin, Michael.

FACULTY OF LAW.

Second Year.

Horgan, Michael J., B.A.		O'Brien, Thomas F.
--------------------------	--	--------------------

First Year.

Horgan, George Bowring.		Troy, John.
-------------------------	--	-------------

Exhibitioners.

Mooney, James J.		Collins, Edmond.
------------------	--	------------------

FACULTY OF MEDICINE.

Blayney Scholar.

Kennedy, Robert S.

Senior Exhibitioner.

Cummins, Arthur G.

Fourth Year.

Tobin, Thomas.		Ridge, Percy B.
----------------	--	-----------------

Special Scholarship.

Pearson, Charles B.

Third Year.

Shorten, James A.		Kearney, John J.
-------------------	--	------------------

Second Year.

O'Regan, William F.		Johnson, John C.
---------------------	--	------------------

Exhibitioners.

Charles, John J. P.		English, James E.
---------------------	--	-------------------

First Year.

IN LITERATURE.

O'Keefe, Ellen M.

Exhibitioners.

O'Flynn, Jerome.

Crowley, Albert T.

IN SCIENCE.

Scanlan, Thomas.

Exhibitioners in Practical Medicine, Surgery, and Midwifery.

PRACTICAL MEDICINE,	Irwin, William.
